Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's election without traverse of Group I (Claims 1-3, 8-10, 15-17, and 22-24) in the reply filed on 1/21/05 is acknowledged. Claims 4-7, 11-14, 18-21, and 25-32 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse.
2. Applicant is required to cancel claims 4-7, 11-14, 18-21, and 25-32.
3. Claims 1-3, 8-10, 15-17, and 22-24 are considered for examination.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-3, 8-10, 15-17, and 22-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention:

- a. In claims 1, 8, 15, and 22, "respective amount" is indefinite because it is not made explicitly clear in the claim language what this is respective to and it is unclear what this amount is.
- b. In claims 3, 10, 17, and 24, "donor process" is indefinite because it is not unclear what is being donated and it's not made explicitly clear what this donor process does. In the claim language, it doesn't perform anything. It just simply exists.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-3, 8-10, 15-17, and 22-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Wagner (US 5,940,868).

6. As to claim 1, Wagner teaches a method for allocating memory to a process on a computer (memory allocation method and apparatus) (*see Title*), the method comprising:

creating a plurality of processes (creating a multiplicity of processes) (*col. 1, lines 59-65*), each process being allocated a respective amount of memory (access of a respective portion of physical memory for a corresponding process) (*col. 2, lines 1-11 and claim 3*); and

pooling (aggregating) the allocated memory for the processes together for use by at least one of the processes (*col. 1, lines 59-67, claim 11*).

7. As to claim 2, Wagner teaches wherein the at least one process is a single consumer process (request to access resource) (*col. 3, lines 40-51 and col. 4, lines 1-7*).

8. As to claim 3, Wagner teaches wherein the processes include one consumer process (request to access resource) (*col. 3, lines 40-51 and col. 4, lines 1-7*) and at least one donor process (software routines resident in memory such as system kernel code and application user code) the number of donor processes determined from the amount of allocated memory (*col. 1, lines 5-44, col. 3, lines 40-51 and col. 4, lines 1-7*).

9. As to claim 8, it is rejected for the same reasons as stated in the rejection of claim 1.

10. As to claims 9 and 10, they are rejected for the same reasons as stated in the rejection of claims 2 and 3, respectively.

11. As to claim 15, it is rejected for the same reasons as stated in the rejection of claim 1. In addition, it is inherent that the computer system has a central processing unit (CPU).

12. As to claims 16 and 17, they are rejected for the same reasons as stated in the rejection of claims 2 and 3, respectively.

13. As to claim 22, it is rejected for the same reasons as stated in the rejection of claim 1. In addition, Wagner teaches a computer hardware system that teaches the means.

14. As to claims 23 and 24, they are rejected for the same reasons as stated in the rejection of claims 2 and 3, respectively.
